

W. I. PROVINCIAL SEC. ADDRESSES LOCAL AUDIENCE

For Home and Country
In the council chamber on Tuesday afternoon June 14th Mrs. Rodgers (Provincial secretary) of Fort Saskatchewan spoke before a large gathering of ladies of this district. She gave an interesting lecture on the history of the organization from its start in Ontario 30 years ago to the present day covering the Dominion from the Atlantic to the Pacific coasts.

The first W. I. was started at Lea Park north of Vernon in 1912 there are now 300 organizations in Alberta.

Mrs. Watt of Victoria who was overseas during the war organized the first Women's Institute in England today there are 1500 more with a membership of almost a quarter of a million.

Mrs. Rodgers made it clear that the W. I. was not a Government affair in any sense but had the "Motto of Home and Country" for its aims but dealt with things Educational and development of a community life, holding that contented and happy women will make for better and happier homes.

America has 69 women's clubs everyone exclusive while Canada with its W. I. is one of the largest organizations for women in the world: open to all, and absolute non-sectarian. The speaker made her audience clearly understand that the success of the W. I. was up to the members individually and in the spirit of Optimism, which she had for the work of the W. I. and the loyal support they give to their officers lay their success to work in harmony with one another to be able to tell others of the work of the W. I. to try and make the world a better place in which to live were objects worthy of the best efforts of all who had the good of the W. I. at heart. At the conclusion of the lecture, which was much enjoyed by all, a unanimous vote of thanks was given Mrs. Rodgers for her very able address.

THE NOVELTY OF THE DAILY TASK

Most of us get a rut, of course. Any student of human nature will tell you that.

The real difficulty is not that things may not go reasonably smoothly in a rut, but that they don't get better or bigger.

The things we do repeatedly we are apt to do unthinkingly at a while, and the world demands improvement which only comes by thinking.

The need of most of us is to see the novelty in our daily task so that we may wonder at it and how to improve it.

We get used to it and are not conscious of it.

As for example:
There lived a man with a fine, long wide luxurious beard reaching nearly to his waist.

It was one of those beards we see in the country churches some times, or in the family portraits unpopular in the shirt and collar trade.

Well, this gentleman, visiting a friend one day, was entertaining a little daughter of the family who, admiring the beard, asked him as one of a series of questions what he did with his beard at night.

He was stumped. He couldn't tell. He just wore it.

But that night he determined to discover.

First he laid it carefully outside the covers, but he felt as if he were laid out.

He tucked it under the covers, but every time he moved it pulled the skin on his face.

Next he tucked it inside his pajamas. That didn't suit him because it tickled him.

So he sat up half the night trying to dispose of something he had had for twenty years and slept with all that time.

It had grown on him and he was so used to it that he wore it unconsciously.

Well, that's what happens in our work. We get too used to it. But there is a constant novelty in it.

Why wait for the other fellow to discover it and improve upon it?—Ex.

CANADA'S EXPERIENCE AS A MODEL

The United States, like most of the countries of the world, is looking for new methods of increasing its revenue. If one may judge by the latest comments of the American press, the sales tax seems to be growing in favor. At first the opposition to this tax was strong, but after a full and frank discussion of various methods of raising necessary national revenue many of its opponents have become advocates of the theory that all the taxes thus far proposed this one is likely to prove the least burdensome, and to be the least burdensome.

The experience of Canada has been widely cited. It has been noted with interest that Canada has decided to increase the rates of the sales tax, after a year's trial of this form of taxation. Many American newspapers have used the example of Canada while urging Congress to give this new method of raising revenue a thorough and searching examination.

The opponents of the sales tax, of whom the labor unions are among the most vigorous, assert that the sales tax may be passed on to the people. Which has led the Chicago Post to exclaim: "To get down to cold facts, the public will pay this tax. Few taxes on production do not eventually come out of the selling prices of goods."

But a 1 per cent. tax on all sales would not raise prices, in extreme cases, more than 3 1/2 per cent. In the case of an article which is bought, and sold several times between the production of the raw material and the final sale tax is not 7 per cent., as has been claimed. If the articles, say, a \$50 suit of clothes, the first tax paid would be 1 per cent. of the raw wool worth, say \$5 or 5 cents so that it would add only one-tenth of one per cent. to the cost of the suit. Carrying on these calculations it is shown that a 1 per cent. sales tax never costs the buyer more than 3 cents on any dollar of purchases.

The American congress is proposing to go much farther in this direction than Canada has. Its plan is, if the tax is adopted, to make it a turnover tax—a tax on the gross earnings of every business and profession.

Canada has been more moderate in applying it. This moderation may account for the minimum of public dissatisfaction with it in this country.

C. G. I. T. CLASS HOLDS FINAL MEETING OF SEASON

On Friday evening the Canadian girls in training class conducted by Miss Helen Torry conducted its final meeting in Grace Methodist church. The following members were present: Misses Mabel Prosser, Florence Torry, Alice Hart, Edythe Hart, Edythe Love, Mary Scofield, Bessie Welch, Gertrude Olsen, Dorothy Bdown, Lavina Hase, Alma Miles, Milda Brine, Laura Matthews, Miss Torry and Mrs. N. F. Priestley.

The chief business of the evening was deciding the two delegates to attend the Fall C. G. I. T. camp in July. This was done by ballot which was unanimously in favor of the Misses Florence Torry and Mary Scofield.

At the close of the meeting ice cream and cake were served in the parsonage.

The cry that there are no honest men is a false one. Think of the physician who cures his patient and shuts off his source of revenue.

WEDDING BELLS

LARSON—HJELDEN

At St. Andrew's (Presbyterian) manse on Tuesday June 14th the Rev. J. B. Thompson solemnized the nuptials of Miss Josephine Hjelden and Mr. Arthur Larson. Both these young people are residents of the Roror district. The marriage of Mr. Ole Peter was showered upon them.

PETERSON—JONASON

trict and many congratulations were extended to the bride and groom. The wedding took place in St. Andrew's manse on Saturday June 18th. Rev. J. B. Thompson officiating.

MAJOR STRONG, OF CHAUVIN, PROVES CHOICE OF LIBERALS' CONVENTION

Convention held at Wainwright unanimous in choice of nominee to contest seat in next provincial election; Dr. H. C. Wallace elected president of central organization.

Upwards of 200 "good and faithful" were present in convention assembled at the Elite theatre on Tuesday afternoon for the purpose of nominating a candidate in the liberal interests at the forthcoming provincial elections. In the absence of Mr. V. E. Graham, president of the central organization for the Wainwright constituency, Mr. C. F. Kirby, of Chauvin, was elected to the chair with Mr. H. P. May as secretary pro-tem.

A credentials committee composed of Messrs. Garson, Wyatt, Keith Smalley and Hunter certified the accredited delegates to the number of eighty, after it had been decided that these should be appointed from the different pools on the basis of the total vote polled at the last election. During their deliberations, S. G. Walker, from Regina, who worked through Saskatchewan during the last election, spoke at length on workings of different provincial governments. He admitted the work done by Alberta government and this he attributed more particularly to the fact that present body was composed mostly of men who were practically all farmers, i.e. all progress had been made along lines

to better conditions for the farming community. Division of party and secret was a ruinous policy, for only by running the government along business lines as a business proposition could it be a successful government. He hoped to see the return of the Stewart government in Alberta and almost felt convinced of their being again placed in power at Edmonton.

Chairman Kirby in stating that he had no knowledge of election date, said that it was the idea of the convention that it should not be a hard-bound liberal convention but rather one representative of the electorate of this riding who desired to support the Stewart Govt.

A committee of five was then appointed to deal with resolutions these being Messrs. Wyatt, Beattie, McKenzie, Smalley and Sample.

W. Murdoch, of Edgerton, in moving the selection of Major Strong, of Chauvin, as the nominee of the convention pointed out that this gentleman had the unique advantage of being a farmer, a business man and a returned man.

This nomination was received with acclamation and cheers. The nominee, in expressing his thanks for the unanimous nomination mentioned that he had supported the Stewart administration during the last fifteen years which had been farming in the riding. He felt that (as a returned man himself) the provincial government could well be trusted to take care of the problems of the returned soldier. He thought to elect a farmer's part of this time would be some what of a mistake, and felt sure that his prophecy of the return of the Stewart administration would not prove false. After again thanking the meeting the speaker retired amid great applause.

The nomination of officers for the central organization, which was then proceeded with resulted as follows:
President—Dr. H. C. Wallace, Wainwright.
1st Vice-President—W. D. Murdoch, Edgerton.
2nd Vice-President—J. W. Wyatt, Irma.
3rd Vice-President—C. F. Kirby, Chauvin.
Secretary-treasurer—H. P. May, Wainwright.

IMPROVED SEED

The Dominion Department of Agriculture, through the Seed Branch, work in active co-operation with the provinces in the matter of improving grain and field seeds. Money is provided to pay prizes in standing field crop competitions, at seed fairs and provincial seed exhibitions, and in combined seed crop and clean seed competitions.

The named is a recent introduction. It has two distinct phases, the first consisting of a standing field crop competition and the second of threshed and cleaned seed in which the seed produced from the fields of the first phase is judged in the granary of the competitor.

The competitions must have at least fifteen entries in each, and the foundation seed used must be of approved origin. The minimum quantities of cleaned seed that competitors must be prepared to submit to qualify for awards are: wheat barley, peas, buckwheat and corn each 100 bushels, oats 200 bushels, field beans 25 bushels, clovers and timothy 15 bushels, and potatoes 50 bushels. The awards, except in the case of potatoes, are made on a basis of 65 per cent. on the bin score and 35 per cent. on the field score. In the case of potatoes the method is reversed, the award being based on 35 per cent. on the bin score and 65 per cent. on the field score. All agricultural associations are eligible to conduct these competitions, provided the association entering does not conduct a field crop competition in the same season with the kind of crop. To the prize money under the agreement between the Dominion and the provinces, the provinces contribute \$200 in each instance and the province \$100.

MINERAL RESOURCES OF ALBERTA

The extent and richness of Alberta's mineral deposits have lately been given extensive advertisement. Professor John A. Allan, professor of geology at the University of Alberta has been active in giving exact knowledge concerning our resources to the outside world. Through the agency of the Canadian Institute of Mining and Metallurgy he has been instrumental in sending a message of much value to the capitalists and investors interested in mining ventures, a class whose attention this province should be desirous of attracting. He has estimated that the amount of our resources of coal is 15 per cent. of the coal of the world. As he says in this connection, from this figure the importance of the coal resources of Alberta is evident. Professor Allan adds the following noteworthy statement: In the last fifteen years 100,484,038 tons of coal have been consumed by Alberta. Mining operations in the province have been extracted and 26,628,770 tons have been lost without any chance of recovery. Plainly, coal mining operations in this province require investigation and scientific management.

Professor Allan says of the oil possibilities of Alberta and the tributary country, that geological work to date has defined several fields in which there are real oil possibilities. These are:

(1) Southwestern Alberta; (2) the Stettin Hills; (3) the Okotoks field; (4) central eastern—Czar, Monitor, Wainwright etc. (5) central western field—between the North Saskatchewan and Athabasca rivers; (6) the upper Pease River field; (8) Great Slave lake; (9) the Lower Mackenzie basin.

The bituminous sands of Northern Alberta and the Northwest Territories enclose an enormous supply of oil. In Professor Allan's judgment, even a fair portion of this bitumen could be extracted, he declares, there is sufficient oil there to supply the world's demands for a thousand years at the present rate of consumption. Up to the present time no process capable of extracting this oil content has been discovered.

In one of his conclusions all responsible people who want to of existing resources is to be regretted, but it is as much a detriment to the industrial development of the country to have over made regarding any particular mineral deposit or occurrence.

FARMERS HAVE CONFERENCE WITH EDUCATION DEPT.

Important Discussion on Educational Affairs, Resolutions of Approval are Passed.

The joint educational committee of the U. F. A. and the U. F. W. A. held its first official conference with the Minister of Education and officials of the Department in Edmonton last week. A very full and satisfactory discussion took place regarding all phases of rural school problems. The efforts of the Department to provide as also the general attitude of the Department in defending the autonomy of rights of school boards. The members of the Committee made many helpful suggestions and declared their support of any plan that would equalize the educational burden throughout the Province.

After the Conference the members of the joint Committee met in the Corona hotel and passed the following resolutions which were forwarded to the Minister of Education.

That we are in favor of the authorized form of teachers' contract with an amendment to clause 5 regarding termination of agreement, making this clause reciprocal and providing in the event of either party breaking the contract a minimum penalty equal to one month's salary.

That we favor the principal of the conciliation board.

That we express our approval of the increase in the number of examination centres.

That we are in favor of plan of procedure now followed in forming consolidated schools as outlined to us by the Minister of Education.

That we are glad to note that the number of official trustees has been materially reduced.

That we are in favor of a system of Provincial taxation for educational purposes.

The report was signed by P. Baker, Ponoka, Chairman Mrs. M. Gunn, Paradise Valley; Secretary Stephen Lund, Pincher Creek; Henry Spencer, Edgerton.

RAILWAY FARES DROP ON JULY 1st

Passenger rates on the railways come down Dominion Day to what they were before the increase authorized by the Dominion Board of Railway Commissioners last September.

By the order of September the passenger rates were raised 20 per cent. The order said, however, that on December 31, 1920 there was to be a reduction so as to make the rates an increase of 10 per cent. instead of 20 per cent.

MADGE GRAHAM ASPIRING SCULPTRESS OPERATES TEAROOM

In "A Woman Who Understands," Bessie Barriscale plays the part of Madge Graham, an aspiring young sculptress who operates a tea room in Greenwich Village, the artists' quarter in New York until she marries. A young musician, whom she has difficulty in holding because of the arts of a meddling woman. This Robertson-Cole Superior picture will be seen at the Elite theatre Thursday Friday and Saturday.

This picture gives Miss Barriscale one of the roles in which she appears to the best advantage, that of a wife struggling to keep together her little household, and not to let adversity render her sour or discouraged. "The Squirrel Hole" she serves tea and other refreshments, eagerly awaiting the moment when she can get upstairs to her living room and studio where she is at work on a model.

So her life is proceeding until the time when she looks across an air shaft to see a handsome young man out to take his own life. His is a musician, Robert Knight, who has been dismissed from the orchestra, in which he played, for a trivial cause. Throwing a dish through his window and startling him, the sculptress saves the man and begins to carve out her own future.

All is happy for her until three or four weeks later, when her husband is drawn into the net of one of the wealthy idle women who come down to Greenwich Village obsessed with the idea that they must "be artistic" and possessed with no talents of any sort of art, save perhaps "vamping."

The climax of the picture arrives when the husband, who is a violinist, badly burns his hands in extinguishing a fire, and the question of his ultimate recovery is put up to the woman who claims to love and understand him, and the wife who has been faithful and patient throughout all his neglect.

PRESENTATION TO HIGH SCHOOL ASSISTANT

A special meeting of the High School Literary Society was held in the schoolroom on Monday when the main business was the presentation of an exceedingly pretty ivory badge, lamp, accompanied by an address by Miss Jean Howard who is shortly leaving Wainwright. Miss Sybil McLeod read the address which spoke of the affection they all had for the recipient, and said it was a small mark indeed of the esteem and respect in which she was held by those pupils who had come under her supervision.

They part with her with deep regret and feel that they are losing not alone a good teacher but also a good friend. Miss Howard in a very pleasing and quiet manner thanked those assembled for their expressions, and said she felt very happy to be so appreciated by those who were in such a position as to know her best.

OUR PAPER

We believe that a newspaper is a public servant; that it should give to the public all the news without bias or color that is fit to print; that it should stand for an absolute square deal for all people at all times everywhere; that the rights of free speech and free press and free assembly be sacred under our constitution; that any attempt on the part of individuals or officials or other influences to subvert these fundamental rights of the masses should be exposed and denounced and condemned with curses more bitter than those the Roman matrons heaped upon the head of Sextus Tarquinius; that we wrought the deed of shame. If a newspaper founded on these principles and edited and published in this spirit appeals to you, join at once our large family of readers and help us to get this doctrine into the hearts and homes of all the people.

THE GRIM REAPER

STELLA WHITE

The death occurred at Camrose, Alberta, on Saturday June 18, of Stella White, aged twenty-four years, wife of Arthur White, a prominent hardware merchant of Meeting Creek, Alberta. The deceased was the daughter of Andrew Hamilton of Edmonton South. She leaves to mourn her loss a husband and father and two small children, Jean and Billy. The funeral service was held Tuesday afternoon at 2:30 o'clock from Howard and McBride's private chapel to Mount Pleasant cemetery, where she will be buried beside her mother. Mr. White's mother, Mrs. B. White, will arrive in the city on Tuesday to attend the funeral. Rev. G. F. Driver and Rev. W. H. Irwin will officiate.—Edmonton Journal.

Mrs. White was a niece (by marriage) of Mr. N. S. Kenny of town, and a resident of the Tralfalgar district.

Distress In The Throat Caused Great Anxiety

Not an uncommon experience was that of Mr. H. S. Wilcox, of St. Louis, Mo. Many remedies were tried, but no relief was found in "Cathartone." I have been a most distressed sufferer from bronchitis, trouble and catarrh. On damp days, I would have a severe attack of distress in my throat. I used all kinds of medicine but didn't get permanent relief till I had Cathartone. It strengthened my throat, stopped my cough, and made me well. Try Cathartone yourself, see what wonders it works on a bad throat, or cold, catarrh, bronchitis. Different from the old way, because you breathe Cathartone. Get the dollar outfit which includes the inhaler and lasts two months. Small size 50c. Dealers, The Hawthorn Co., Montreal.

Far Away Green Fields

By E. L.

Elizabeth had a hard day. It had been dismal and cold and the furnace had been giving trouble, and the babies had been cross, and as she looked discontentedly out at the snow-clad prairie, stretching away to the horizon, she made up her mind, as women sometimes will, that she and John and the babies should seek a warmer clime. "What was the use of living in a place such as this, where it was so cold and miserable for such a great part of the year and where the women and children were of necessity cooped up in the house all the time, and where, chief aggravation, they had to spend so much money on coal. No wonder, she thought, that so many people left this God-forsaken spot and went away to British Columbia or the Southern States where in the sunlight and the flowers life must be worth while.

And while she undressed the babies, she still called the thought to mind. Though Harold was two and Winifred nearly four, ways and means of getting out of the cold prairie country passed continuously through her mind. Of course she knew she would miss her old friends, but then thought that the other people moved and she had to leave her friends and seemed quite contented in so doing. Elizabeth did not take into consideration the fact that she clung to her old ways and her old associations more than most people and forgot that the prettiest scene in the world was always more enjoyable to her if she could contemplate it surrounded by those she loved. No, like so many people who are guided mainly by impulse she did not go into the details at all. She decided that she hated this cold, hard snow-bound country and that she wanted to live where it was softer, more pleasant and beautiful. By the time she had kissed the babies "good-night" she had mentally persuaded her husband to give up his position, sell their home and, in fancy, she was sitting on the train with the children bound for the "sunny south."

As luck would have it John came home from the office somewhat dispirited. Everything had gone wrong there on that bitterly cold day; there had been misunderstandings with the office force, a scene with his boss, and an aggravating story of conscientious and unappreciated effort, so that when Elizabeth unfolded her plan to him of getting out and hiring themselves away to a place, which her fancy began to paint as a veritable Utopia, he lent a ready ear and said: "All right, I'll put the house in Green's hands tomorrow for sale and if we get our price, we'll get out. I'll write to some firms where I might get a job and tell that sucker," meaning

SUFFERING OF YOUNG WOMEN

This Letter Tells How It May
be Overcome—All Mothers
Interested.

Toronto, Ont.—"I have suffered since I was a school girl with pain in my left side and with cramps, growing worse each year until I was run down. I was so bad at times that I was unable for work. I tried several doctors and patent medicines, but was only relieved for a short time. Some of the doctors wanted to perform an operation, but my father objected. Finally I learned through my mother of Lydia E. Pinkham's Vegetable Compound, and how thankful I am that I tried it. I am relieved from pain and cramps, and feel as if I have saved my life. You may use my letter to help other women as I am glad to recommend this medicine."—Mrs. H. A. Goodman, 14 Rockville Ave., Toronto.

Those who are troubled as Mrs. Goodman was should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound. Those who need special advice may write to Lydia E. Pinkham Medicine Co. (Confidential) Lynn, Mass. These letters will be opened, read and answered by a woman and held in strict confidence.

Plants Generate Electricity

Would Solve Light Problem If It
Could Be Used.

All living plants generate electricity and when they die this is discharged into the air. If science could only devise some plan for capturing this dissipated electricity, and harnessing it to the use of man, the problem of light and power would be solved for all time; for countless millions of plants are constantly dying all over the world, and releasing an immense amount of electricity. Electricians tell us that if it were possible for all the trees in a forest to die at exactly the same moment a terrible catastrophe would be the result. Every body living within a radius of many miles would be instantly electrocuted, and all animals and birds in the same area would suffer a like fate.

Sponge is Queer Fish

Grows Mostly on Rocks at Bottom
Of Seas.

Sponges were long thought to be vegetables, but they are now known to be animals. Their appearance when they come to the market is so unlike that of the living sponge that it is quite to be expected that seeing it only in use one would hardly suspect its origin. The sponge grows mostly at the bottom of the sea, or rocks to which it is fixed by a kind of root. It is made up of a jelly-like substance and a framework of tough fibers. This framework is really the skeleton of the sponges; it is the sponge of commerce. The skeleton is covered with a jelly-like substance and is sticky when taken out of the water. Sponges are usually buried in dry sand for a time until the jelly part dries. They are then put in wire cages into the sea until they are washed clean.

France Has Currency Problem

Experimental Issues of Paper Money
Proved Failure.

France is facing a serious problem in supplying a currency to take the place of small silver change, which disappeared in the magic of this country. Experimental issues of paper money in small denominations have not met the problem and have resulted only in general exasperation. This paper currency becomes ragged, and the Government decided to dispense it by means of paper money. It requires small money to the value of 400,000,000 francs to meet the requirements of France, however, and the mint has a maximum capacity of 100,000,000 francs per year.

Revision Of The French Language

Present Edition May Be Completed
In 1964.

The official revision of the French language, which is in the hands of the French academy, has recently made great progress, and the first volume, ending in the letter H, and forming half of the eighth edition of the dictionary has now been completed. Some 24,000 to 25,000 words have been revised since 1878, that is in forty-three years. The chairman who presided over the sitting of the academy at which this result was announced, stated that it is hoped to complete the present edition about 1964, or eighty-six years from the date at which the work began.

Summer Storage Of Coal

On the subject of storage of domestic coal during the summer it has been usual in England when coal was used without shelter, that a wall was built of coal, and the coal was applied over it; and that this had the effect of preserving the coal from the action of the weather.—Edmonton Bulletin.

The Patriotic Man Is Loyal To His Country

It is a patriotic man who is loyal to his country. It is a patriotic man who will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

Jealousy Brings A Lot Of Fruit That Should Not Be Preserved.

Jealousy brings a lot of fruit that should not be preserved.

DELICIOUS AND REFRESHING

It is a patriotic man who is loyal to his country. It is a patriotic man who will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

And six months from the time they left the little home they returned.

They had spent a great deal of money and the babies had suffered much, but Elizabeth and John had learned a wonderful lesson regarding distant green fields which seem so beautiful in mood of our lives, at some time or other, and which prove merely a mirage after all.

And they settled down to make the best of their lives on the prairie, with its cold, its snow and its hardness, for they had found that there were sufficient compensations to them to make up for the whole of the sunny south-land.

Improvement In Weed Control

Number of Inspectors in Manitoba
Has Been Increased.

Compared with five or six years ago, there is a marked improvement in the control of weeds in the province, and, judging from the spirit animating weed inspectors, that improvement will be even more marked in the future, according to Professor S. A. Bedford, administrator of the Noxious Weeds Act.

Prof. Bedford said contentedly had been held at Winnipeg, Brandon, Portage la Prairie, Morden and Dauphin. They had been called to discuss the provisions of the act as amended at the last session of the legislature, and had been well attended by weed inspectors, reeves and councillors. The number of inspectors had been increased, and a feature of the conference was the way in which the more experienced men had made suggestions to the new officials as to how to overcome difficulties.

Famous Timepiece

Mary Queen of Scots Possessed a
Watch of Great Value.

The fragile watch of dainty pattern and design, which today is a favorite among women, is in striking contrast to some of the watches which were famous several centuries ago. Many of these were of enormous size and of the most ornate design. Mary Queen of Scots was the possessor of a death-head watch, which was of silver gilt and most elaborately ornamented. The forehead of the skull bore the symbols of death, the scythe and hourglass placed between a palace and a cottage to show the impartiality of the grim destroyer. At the back of the skull was Time destroying all things, and at the top of the head, feathers of the Garden of Eden and the crucifixion.

Englishman's View

London Publisher Says America Is a
Paradise Compared With England.

To those who are disposed to take a gloomy view of conditions in this country may be commended the views expressed in the New York Times, by Ernest J. P. Benn, a London publisher, a recent visitor. "To him America seems as compared with England, a paradise. 'I wish,' he said, 'I had come here twenty years ago. It would have made me a better business man.'

A Growing Batrain

Clever English Woman Got Ahead of
Market Gardener.

Some of the English are quite as keen on saving and bargaining driving as the Scotch. Take the following case: "You can't beat my old woman at getting the most for her money," said one Englishman. "She went to a market gardener and insisted on choosing a marrow that was still growing. 'How much for this one?' she says. 'Eight pence,' says he. 'Too much,' she says. 'What's the price of this one?' 'Four pence.' 'All right, I'll have it,' and she pays for it on the spot. Then she says, 'But don't cut it now, I'll call for it next week.'"—Boston Transcript.

West Africans And Dictionary.

The "educated" West African negro rivals the Babu in the artless art of missing English polysyllables. As he appears also to nourish get-rich-quick ideas he bombards firms whose names he finds in the dictionary with proposals to do big business. A Manchester man who collects these epistles has just received one which winds up with "trusting you are in the same homogeneous category, yours equally, T. E. Atkins—From the Manchester Guardian.

Special Rate For Hay.

The Saskatchewan Department of Agriculture has induced the railway companies to quote a special rate of \$10 per ton on hay from Montreal to any point in Saskatchewan, provided the feed is purchased by bona fide farmers through the municipal authorities.

"Your Teeth"

By Res. Proctor, M.D.,
D.D.S., Editor of Oral Hygiene.

THE THIRD HAND.

Copyright, 1921, by Res. Proctor, M.D.

It is very amusing to see a couple of foreigners, or even home-bred sometimes, waving and gesturing wildly with their hands in an ordinary conversation.

We don't seem to consider that it is up to the hands to help with the talk and a little of the month's work occasionally; the month certainly does enough work that belongs to the hands.

From our earliest infancy to tottering old age we use the month as an enormous workshop, grinding, turning, carrying, lifting, pushing, pulling, hammering, lubricating, wrenching, vice, working on offense and defense—and for unnumbered other duties in addition to its proper work.

As for the "third hand" commonly used as a third hand.

This means an enormous amount of wear and tear upon the teeth, gums and jaws—that does not come from chewing alone.

Almost everything that is put into the month has infection of some kind upon it.

The very fact that we suffer so little from this overuse of the month shows that the saliva must be a germ killer, to a very considerable extent, but the saliva does not always protect us from infection from these outside sources.

Many very serious conditions arise from the "third hand" use of the month. In addition to infection the unreasonable strain upon the teeth often breaks the enamel and occasionally breaks off whole teeth, fillings which are loosened, encouraged and the irritation to the lips, cheeks, gums and tongue favors cancer.

The habit of biting threads instead of cutting them causes a chronic inflammation of the membrane that covers the roots of the teeth and will cause the loss of the teeth. It is much more comfortable and cheaper—to buy scissors.

In fact the value of the month is so great that it is poor economy to abuse it.

An Englishman's View

London Publisher Says America Is a
Paradise Compared With England.

To those who are disposed to take a gloomy view of conditions in this country may be commended the views expressed in the New York Times, by Ernest J. P. Benn, a London publisher, a recent visitor. Merchants Bank Officials

Express Tempered Optimism
Regarding Business Situation

President and General Manager Review the Canadian Business Situation With Much Hope—Financial Position of the Bank an Exceptionally Strong One—Crop Outlook Encouraging.

At the annual meeting of the Merchants Bank of Canada, the various reports which were presented showed that this institution occupies a commanding position in Canadian financial affairs. The addresses of the President, Sir Montagu Allan, and the General Manager, Mr. D. C. Macarow, were concise statements of present day conditions and contained an optimistic survey of the future. These reports showed that every department of the bank is in a most excellent condition, and would indicate that this bank is rapidly increasing the sphere of its influence in every avenue of trade and commerce at home and abroad.

The President's Address.

Sir Montagu Allan in part said: "The general depression in business, felt to a greater or lesser degree in every country in the world, has affected the business of the bank to some extent, but we hope the low point of depression has been passed, and that there will soon be a change for the better. The coal strike in England which will no doubt result in the loss of many thousands of jobs, and the general depression and discontent which seems to prevail in nearly all the countries of Europe, give rise to serious financial problems to be reckoned with, but no man in this country who is strong of heart and of mind, and who is a realist for any length of time. The known and undeveloped resources are sufficient to ensure future prosperity."

New Issue of Stock.

"As mentioned in last year's report a further issue of \$2,000,000 of new stock was made, the paid-up capital of the bank \$10,500,000, and the transfer of the premium on the new stock to the reserve account, the reserve fund stands at \$2,500,000."

"The shareholders of the bank now number 2,997, as against 2,622 in 1920, an increase of 375 during the year."

Current loans and discounts stand at \$109,183,000, as against \$113,198,000 last year. It will be seen, therefore, that this bank continues to extend its ample share of assistance to the industry of the country."

General Manager is Optimistic.

Following the president's concise yet comprehensive review of the situation, as reflected in the year's statement, Sir H. H. Macarow, there is little left for me to add beyond, perhaps, a word or two by way of amplification."

It will be observed that in comparison with last year's figures, our total assets show a shrinkage of about \$7,000,000, or roughly 7 1/2 per cent, which, in view of all the surrounding circumstances must be regarded as a satisfactory showing. The liquid position being well maintained the white.

The trend of our interest-bearing deposits for the same period has been steadily upward, an increase of that department of about \$7,000,000 being shown, but this gain has been more than offset by the decline in the total ordinary deposits. A year ago, however, under the heading of demand deposits, a sum of about \$8,000,000 stood to the credit of the Government in connection with Victory Loan payments. This amount, of course, was of a purely temporary nature, was withdrawn during the year, and after making allowance for it, the total deposits and total assets about held their own, a satisfactory achievement we have no doubt you will agree."

Crop Reports Are Promising.

Crop conditions throughout the country are at the present moment exceptionally promising. If I may say a word as to general conditions it will be one of tempered optimism, indicating a due comprehension of the many difficulties which require to be met but having, at the same time, a proper appreciation of the actual and potential riches of this country."

There are indications that the monetary position, broadly speaking, is less stringent than that the general liquidity of credit now in evidence is continuing to develop further."

Altogether and in a word, it is not difficult to be an optimist as to the future of "Canada Unlimited," to borrow the apt expression recently used by an eminent Canadian."

The Board of Directors was re-elected with Sir H. H. Macarow as President, and F. Howard Wilson as Vice-President.

Saskatchewan Offered German Airplane

Souvenir From Canada Air Board
Could Be Used.

A German airplane, to be added to the Saskatchewan war souvenirs, is to be available for flights, is the offer made by the Canada Air Board to the Saskatchewan branch of the Canadian War Veterans Association.

The type of machine which would be donated has not been specified, but it is understood that it would be airworthy and not merely something to be put in a hangar and left "to rot."

"You have no real poverty, because you have no indifference. If any of you are poor you don't wallow in it, you have the determination to beat it and get up. Because there is no indifference and no poverty and no helplessness here, socialism will not become rampant as it is in England, where the labor party numbers 10,000,000 people and has imbued fully half the population with the ambition to destroy capitalism. There is no possible chance that this collective idea will ever take root here, as it has all over Europe since the war because there is no soil in which it can grow. This is an industrial El Dorado."—Indianapolis News.

No Wonder He Was Soar!

It hardly came on midnight when Mrs. Belman knocked loudly on her neighbor's door. It was opened by Jones, clad in a dressing gown and a sour visage.

"Oh, good evening, Mr. Jones," said the lady in agitated tones. "Could you oblige me with the date of the first Polynesian War?"

"Why, 431 B.C. was the date, I believe. But may I ask—"

"Oh, yes, that's right, thank you so much. Baby's got croup, and I wanted to ring up the doctor, and that's how I remember his telephone number."

Good Price For Bulls.

At the annual sale held at Edmonton this spring thirty-one Herefords, including calves from ten to eighteen months old brought an average price of \$245 per head.

Some people would rather not do a thing at all than do it right.

What Tact Is.

Tact is the surmounter of difficulties—the remover of obstacles. It is useful in all places and in all times. It is useful in solitude for it shows a man his way into the world, and in society and commerce, for it enables him to pass successfully through the world.

If you are at a loss to know how to take a man, let him remain where he is.

CLARK'S Kitchen at your Service again this Summer

Fine ripe tomatoes fresh from the fields give it their delicious flavour, and all you have to do is to heat and serve.

CLARK SOUPS are made in 13 different sorts, and include chicken.

Like all "Clark Good Things" the price is moderate.

Made from Canadian Farm Produce and sold everywhere in Canada.

To Look Young

is a valuable asset to women in business, social and private life. Nothing helps so much as a good complexion. Poor complexion causes one to look sickly and faded.

Prospectors Satisfied

Great Interest Shown in Gold at Peace River.

A special dispatch to the Edmonton Bulletin, from Peace River, says: "With the return to town of Charles E. Scott, of Dayton, Ohio, the first man to reach the location that may yet prove to be rich in gold, interest in the alleged discovery is at fever heat."

"Dr. Gauthier arrived in town on his way to Edmonton with a view to having his gold assayed. He has nothing to say for or against, beyond the fact that he has not asked the crowd to follow him, nor does he care whether anyone is satisfied with what they have seen. In a brief interview, he said, 'I consider I have the goods, I am well satisfied, as are the rest of my party.' I will return here in a few days with the intention of running a drift into the hill, and hope to strike rich yet, but in any event I am well satisfied with what I have got."

Doing Things. Wisdom is 'knowing what to do next. Skill is knowing how to do it, and Virtue is doing it.—David Starr Jordan.

Nervous Headaches Dizziness

COULD NOT SLEEP

Wherever there is any weakness of the heart or nerves, flagging energy or physical breakdowns the use of Milburn's Heart and Nerve Pills will soon produce a healthy strong system. They renew lost vitality, build up the strength, increase mental activity, give nerve and brain power, improve the appetite and make rich, red blood, thus banishing nervousness, headaches, sleeplessness, nervous prostration, heart palpitation, shortness of breath, faint and dizzy spells, smothering feeling, anaemia, general debility and all troubles arising from a run down system.

Mrs. M. Dandand, Youngs Cove Road, N.B., writes:—"I was bothered very much with my heart and nerves, had nervous headaches and dizziness, could not sleep nights and my appetite was all gone. I was almost on a nervous breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. This I did, and before I had the second box used I was better."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Watchmaker Shows Skill in Boring.

An unusual boring has been performed by a watchmaker at Cambridge, Mass. He bored a hole through a pin longwise, and now has the pin with a 'wire' running through the hole, as a proof of his skill. He claims to have worked on the principal of the telephone about the same time as Alexander G. Bell.

More men die of illness than of hard work.

PILES

Do not suffer from Piles. Dr. Chase's Ointment will cure you. It is a sure cure. Sample box free if you mention this paper and enclose 30c. stamp to pay postage.

MONEY ORDERS

Domestic Express Money Orders are on sale in five denominations through the Star.

Cook's Cotton Root Compound

A reliable remedy for all ailments of the bowels. It is a sure cure. Sample box free if you mention this paper and enclose 30c. stamp to pay postage.

BOOK ON DODD'S KIDNEY PILLS. Address by Dr. W. N. U. 1372.

W. N. U. 1372

Better Times Ahead

Recent Annual Merchants Bank Meeting, Globe, Encouraging.

In this period of doubt and hesitation concerning the outcome of the economic strain which the financial and industrial world is undergoing in its travel back to normal from the abnormal developments of the war period, expressions of opinion from those who are qualified to express opinion are naturally much appreciated.

From no source, perhaps, comes such valuable information as from banking sources. Bankers sit in the watch tower of industry.

The annual meeting of the Merchants Bank of Canada brought out expressions of opinion from the president and general manager which cannot but have a good effect upon commercial sentiment in Canada. In these opinions was much of warning to industry to go carefully until difficulties in the way of complete recovery have been overcome. At the same time, a strong note of optimism ran through the official remarks, the effect of which is all the more encouraging by reason of the recognition that these remarks were carefully considered and prepared with the knowledge that they would go on record and have an important bearing upon the action of the community.

From Sir Montague Allan, president of the Bank, came the view that the low point of the depression has passed.

This is a crucial point. From time to time the hope that the worst is behind has been indulged and acted upon with unfortunate results. Matters, instead of improving, became worse and worse until the belief that the road had been cleared, came to grief.

Sir Montague expressed the view that there will soon be a change for the better. While expressing confidence in the future prosperity of the country, he took occasion to advise the customers of the Bank to exercise much caution in making new commitments, at the same time making allusion to the coal strike in England and the unrest and discontent in Europe and the serious financial problems arising therefrom.

He concluded this portion of his address by declaring that, with the known and undeveloped resources of this country, no man here who is strong and healthy, could long afford to be a pessimist.

D. C. Macarow, the general manager, after alluding to several particulars of the financial statement for the past year, passed on to the discussion of general conditions. In this connection his viewpoint was one of "tempered optimism," to employ his own descriptive term.

He pointed out that the banking institutions had a large "carry-over" in Western Canada by reason of the unfortunate crop failures, last season, in sections of that country and the resulting financial losses to farmers. A more encouraging note was struck, however, in dealing with the coming crop. Throughout the country the prospects are now exceptionally promising, and he expressed the fervent hope, in which all will join, that the actual results may measure up to present expectations.

Glassmaking in Belgium

One of National Industries Source of Great Wealth.

Glassmaking is one of the great national industries of Belgium. Even before the war it was a source of large wealth, and today it is playing an important part in rehabilitating the country. Belgium has been famous for its glassmaking for many centuries, and at the present time glass holds first rank among the general exports from Belgium to all countries. There is scarcely a civilized nation in the world that is not more or less dependent upon Belgium for window glass, mirrors and table glass.—Youth Companion.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

To Extend Manitoba Varsity

Building For Medical Branch Will Cost \$250,000.

A new building for the medical branch of the University of Manitoba, Winnipeg, is to be erected this summer, costing approximately \$250,000, and will meet conditions laid down by the Rockefeller Foundation for its gift of \$500,000.

Minard's Liniment used by Physicians

"Movie" Of Rockies.

The first motion pictures of the Canadian Rockies taken from the air were secured recently by Motion Picture Limited, of Calgary. The flight was made from Cowley through the Crow's Nest Pass. A number of photographs were secured at an altitude of 5,000 feet.

Alexandra Likes Pearl Diet.

Pearls are the favorite ornament of Queen Alexandra. Her fondness for them is well known, and she has seldom been photographed or painted without rows and ropes of them.

Even when the unexpected happens there is always someone who says: "I told you so."

Canada Chose Her Governor-General

London Times Says Dominion Virtually Made Appointment.

Consigning on the appointment of General Lord Byng as Governor-General of Canada, the London Times says the choice could not be bettered, for it endorses a preference expressed in many parts of the Dominion. "Lord Byng will go to Canada as to the home of countless friends," the Times says.

Though the actual appointment of the Governor-General rests with the King and his advisors in this country, the Times thinks that it is not too much to say that in this instance the Canadian people have made their own choice. If such preferences on such excellent grounds of close personal knowledge could be expressed with the same frankness every time an appointment of the kind had to be made, it would be a good thing for both this country and the Dominions also, is the Times view.

Killed By Blood Poison

Used an old razor for paring his corn. Foolish because 25c buys a bottle of Dr. Williams' Pink Pills for Pale People, which will cure him. Refuse a substitute, 25c everywhere.

New Invention Proves Valuable

Large Sands Realized by Extracting Gold and Platinum From Sand.

A new machine for extracting valuable minerals from the black sands of the Queen Charlotte Islands has been tried at several places and proved entirely satisfactory. As a result a number of machines have been installed at various points on the coast and are operating. Gold and platinum are extracted from the sands paying fifty cents to one hundred dollars a ton, chiefly platinum.

A DESIRE TO EAT WHAT YOU WANT

Stomachs Can Be Restored to a Healthy Condition.

Not to be limited in diet, but to eat whatever he pleases is the dream of every dyspeptic. Dr. Williams' Pink Pills promise to restore any stomach to this happy condition, because all people cannot eat the same thing. With equally satisfactory results. But it is possible to tone up the digestive organs that a pleasing diet may be selected from articles of food that cause no discomfort.

When the stomach lacks tone there is no quicker way to restore it than to build up the blood. Good digestion without rich, red blood is impossible. Dr. Williams' Pink Pills offer the best way to enrich the blood. For this reason these pills are especially good in stomach trouble attended by thin blood, and in attacks of nervous depression. Proof of the value of Dr. Williams' Pink Pills in cases of indigestion is given by Mr. John A. McDonald, Tarbol, N.S., who says: "Every sufferer from indigestion has my heartfelt sympathy, as I was once myself a bond slave to it. Eating at all was a torment and at last I became a mere skeleton of my former self. I took all sorts of remedies, but to no avail. Then a friend said to try Dr. Williams' Pink Pills, and I did so. It was a change. Then I got six boxes more, and by the time they were used, I was eating my meals with regularity and enjoyment. My general health is now good, and I am an enthusiastic advocate of Dr. Williams' Pink Pills."

An Oil that is Priced Everywhere.

Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a man who knew it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Area Sown To Fall Wheat

Largest Proportion Winter Killed Was In Ontario.

The area estimated to be sown to fall wheat for 1921 was 792,000, of which 738,000 acres were in Ontario, 38,000 acres in Alberta and 14,000 acres in British Columbia, according to the first crop report of the season issued by the Dominion Bureau of Statistics. The proportions winter killed are reported as eleven per cent in Ontario and five per cent in Alberta; in British Columbia the crop was practically unharmed.

Few Of Them.

"The young man who does not read the newspaper intelligently has little interest in things worth while," said Thomas A. Edison the other day. "This failure to be interested indicates that the mind is not functioning properly, that the brain is atrophied." Fortunately for the world's progress, there are mighty few of them.—The Fourth Estate.

SUNDAY SCHOOL LESSON

LESSON FOR JUNE 19.

MAKING THE SOCIAL ORDER CHRISTIAN.

"Again we say, 'making the Social Order Christian.' If the community please. At least these texts selected by the committee do not teach, for they have no bearing upon the question. Why two texts so widely separated in meaning should be selected to go together under the subject named is incomprehensible. The teacher should therefore ignore the subject chosen and endeavor to bring out the meaning of the texts."

1. Jesus in the Synagogue at Nazareth (Luke 4:16-21).

2. Jesus reading from the Scriptures (vs. 18-19). He opened the book at the sixty-first chapter of Isaiah and read the Scripture passage which set forth His entire mission.

3. Chapter of His mission (vs. 18, 19). (a) Preach the gospel to the poor. God has peculiar regard for the poor, and the glory of the gospel is that it comes to the help of the very ones most in need. It puts a ladder at the feet of a man and enables him to climb as high as his ability will permit him. (b) Heal the broken-hearted. (c) Preach deliverance to the captives. Those who are in captivity to sin and Satan. Christ can and will deliver (John 8:34-36). (d) Recovering of sight to the blind. Christ not only can open the physical eyes, but the eyes of the spirit as well. (e) Set at liberty them that are bound. Satan has been most mercilessly bruising men, but the Mighty One has come who can set them free. (f) Preach the acceptable year of the Lord. This was the Year of Jubilee which looked forward to the glorious millennium age (Lev. 25:10-54-55). (g) His endowment (vs. 18). The Holy Spirit came upon Christ for the express purpose of fitting Him for His divine mission. Because of this endowment He cannot fall in His glorious work.

4. His testimony (vs. 20, 21). Having completed the reading, He declared that the Scripture had fulfilled them and there in Himself. This was a critical hour for the people. May it be just as critical for the members of every class where this lesson is studied. May there be no one who feels that which followed His testimony at Nazareth.

II. The Judgment of the Nations (Matt. 23:34-40).

The biblical unit here is verse 34. It is a sad commentary on the people selected without their setting; so it would be better to take a survey of the whole.

This judgment should be carefully distinguished from what is popularly called "General Judgment." The Bible speaks of different judgments, differing in respect to the subjects, the place, the time, and the results of the judgment. Note the following particulars:

1. The Judge (vs. 31). The Son of Man in glory.

2. The time (vs. 31). It is when the Lord shall come in His glory accompanied by His glorious retinue of angels.

3. The place (vs. 31). It will be on the throne of His glory. This throne will be most surely in the land of Israel. The prophecy of Joel, third chapter and Zechariah 14:1-5 make it to be in or near Jerusalem.

4. The people judged (vs. 32-35). These people will be the living nations upon the earth after the Church has been translated (1 Thess. 4:16, 17). These nations are the ones to whom the gospel of the kingdom shall be preached just prior to the coming of the Lord (see Matt. 24:14). The preachers of this gospel will be Jews (Rev. 7: Rom. 11:13).

5. The issue of the judgment (vs. 36, 37-41). The sheep enter into the inheritance of a prepared kingdom (vs. 34). The goats go into an everlasting fire prepared for the devil and his angels. Their destiny is fixed (vs. 46).

An Oil that is Priced Everywhere.

Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a man who knew it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Tangerine Crepe

Makes Gay Frock

By Marie Belmont.

Tangerine is one of the colors greatly liked this season. It is chosen for the fashioning of this attractive dress that affects the lines so much admired by the young girl and woman of athletic build. The skirt is straight and slightly shirred at the waistline. The blouse is cut with a U-neck opening. This, however, is partly filled in by a piece of silk which is designed with blocks of black and tangerine. The short sleeves are adorned in the same manner, while pieces of the checkerboard silk are set in where pockets might naturally be expected.

Report Discovery of Iron

One In Northern Ontario Also Contains Other Elements.

A discovery of a large body of high grade hematite iron ore in the Elk Lake district of Northern Ontario has been reported. Iron was not expected to be found in paying quantities in that district. Much of the iron ore in the great range of which the Adirondack and Moose Mountain deposits are a part is of 50 per cent metallic content, but contains other elements that render necessary special blast furnace treatment.

The Good Luck Of Sergeant Heyne

Fine Samples of Humanity Awaiting Trial for German War Crimes.

Sergeant Heyne, of the German army, has been sentenced to 10 months' imprisonment for ill-treating British prisoners of war. He is the first German to be convicted and punished for war crimes. He was shown at his trial to have exceeded the requirements of his position as guard in 28 cases, and the prosecutor asked that he be sentenced to ten years. The German judges, probably feeling that all this happened a long ago, and that bygone should be bygones, let their fellow-countryman off with ten months; the sentence apparently, is one of simple detention, so that after lifting for a few months, the brave sergeant will get his liberty again; he will have suffered practically nothing, and the "incident" of this particular contribution to German frightfulness will be officially closed.

An Odd Straw Hat.

One of the oddest straw hats in the world is that possessed by a Marienbad, Austria, café keeper. Every straw in it has been touched by the lips of royalty, for the hat is woven from the straws put in the drinks of the crowned heads of Europe who have frequented his café.

Huge Emerald Found.

An uncut emerald weighing 630 carats has recently been taken to the U.S. for dividing and cutting, as, of course, it would not be marketable in its present form. There are larger emeralds in existence; one in Bogota weighs 1,900 carats.

Give your local merchants a chance. Buy at home.

B. C. People Not Eating Chinese Eggs

Shipments Not Consigned to Chinese Residents Go East.

People of British Columbia are not eating Chinese eggs despite large importations, according to the Department of Agriculture. Thirty-eight carloads of Chinese eggs recently arrived, but they all went through the province to Winnipeg, Toronto, Montreal, New York, Boston, Philadelphia and Trinidad, B.W.I., with the exception of 100 kegs of salt eggs to Vancouver, and 25 to Victoria, consigned to Chinese residents. The eggs contained what is known as egg-meat—eggs shipped in liquid form without shells.

You May Have Kidney Trouble and Not Know It!

If your back aches and you suffer from dragging pains, it is an evidence your kidneys may not be acting just right. What you need is a course with Dr. Hamilton's Pills. They contain both Mandarin and Butterbur and act very beneficially upon the liver and kidneys. "I was bothered a great deal with my kidneys, but got quick relief from Dr. Hamilton's Pills. My trouble manifested itself by pain in the back and by constant headache. I quickly recovered after using a few boxes of Dr. Hamilton's Pills. They brought me health, strength and vigor." Sold everywhere, 25c, or The Catarthorone Co., Montreal.

The Way To Get Through

Keep a Cool Head and Face Your Difficulties.

"Don't you be put out by anything," says Capt. MacWhirr in Joseph Conrad's "Typhoon" to his first mate during the crash of the elements. "Keep your face to the weather, and what they like, but the heaviest sea run with the wind. Facing it—always facing it—that's the way to get through. You are a young sailor. Face it. You're enough for any man. Keep a cool head."

The British public are facing the prolonged coal stoppage in a spirit that would have delighted the gallant Captain MacWhirr.—British Weekly.

Persistent Asthma.

A most distressing characteristic of this debilitating disease is the persistence with which it returns. It is the persistence that makes it so difficult to get away from it. It is the persistence that makes it so difficult to get away from it. It is the persistence that makes it so difficult to get away from it.

An Inch Of Rain

Weather Man Figures It Is 110 Tons Per Acre.

What is an inch of rain? The weather man has instruments for very accurate measurements of it, just as he measures the snowfall, the sunshine and the direction and velocity of the wind, to say nothing of the rise and fall of the temperature. An acre is composed of 6,272,640 square inches, and if there was an inch of water on it that, would amount to 6,272,640 cubic inches. There are 27,726,400 cubic inches in a gallon, so that 6,272,640 cubic inches equals 229,000 gallons, and that much water would weigh 229,000 pounds, or 110 tons. It figures out, then, that an inch of rain falling is at the rate of 110 tons per acre. It is a good thing the tonnage is scattered over so much territory.

Irish Cattle Exports

Worth \$42,000 a Year

During War Country Sent 3,862,223 Head to England.

Before the cattle embargo commencing, T. P. Gill, secretary of the Irish department of the Ministry of Agriculture, said that during the war, Ireland sent 3,862,223 head of cattle to Great Britain and last year's value of stock sent was over 42,000,000 pounds sterling.

The removal of the embargo, he said, would mean a marked reduction in home-bred stores, which might prove dangerous in case restrictions were again imposed on supplies of cattle from abroad.

No change in British agricultural methods was likely to result in a substantial increase in production of stores in England and Scotland and with Irish energies diverted to other channels, Great Britain's nearest source of supply—and that an uncertain one—would be two thousand miles away.

A Good Luck Of Sergeant Heyne

Fine Samples of Humanity Awaiting Trial for German War Crimes.

Sergeant Heyne, of the German army, has been sentenced to 10 months' imprisonment for ill-treating British prisoners of war. He is the first German to be convicted and punished for war crimes. He was shown at his trial to have exceeded the requirements of his position as guard in 28 cases, and the prosecutor asked that he be sentenced to ten years. The German judges, probably feeling that all this happened a long ago, and that bygone should be bygones, let their fellow-countryman off with ten months; the sentence apparently, is one of simple detention, so that after lifting for a few months, the brave sergeant will get his liberty again; he will have suffered practically nothing, and the "incident" of this particular contribution to German frightfulness will be officially closed.

An Odd Straw Hat.

One of the oddest straw hats in the world is that possessed by a Marienbad, Austria, café keeper. Every straw in it has been touched by the lips of royalty, for the hat is woven from the straws put in the drinks of the crowned heads of Europe who have frequented his café.

Huge Emerald Found.

An uncut emerald weighing 630 carats has recently been taken to the U.S. for dividing and cutting, as, of course, it would not be marketable in its present form. There are larger emeralds in existence; one in Bogota weighs 1,900 carats.

Give your local merchants a chance. Buy at home.

World Happenings Briefly Told

The peace treaty with Hungary was ratified by the Paris Chamber of Deputies.

The Ford Motor Company of Canada has declared a dividend of 15 per cent to shareholders, which will be paid soon.

The Bavarian Einwohnenwehr, or Citizens' Guard, has decided to disarm voluntarily by June 30, under the terms of the Allied ultimatum.

Mr. Lloyd George has been ordered by his physicians to take a complete rest. He is suffering as a result of a severe chill from overwork and has cancelled all his engagements.

Lord Byng, Canada's newly appointed Governor-General will officially open the Canadian National Exhibition in Toronto on August 27 next.

Peace River is wildly excited over a gold rush and several parties are grubbing up for a trip to a new find the exact location of which is not known.

After cutting every wire leading into the town, bandits blew the safe of the First National Bank at Williams, 18 miles east of Webster City, Iowa, and escaped with about \$4,000 in currency.

Bellevue's state city hall was gaily bedecked for the opening of the northern parliament, which will be only surpassed in brilliance of ceremony by the state opening which has been fixed for June 22.

Sir Hanna Greenwool, chief secretary for Ireland, replying to an inquiry in the House of Commons as to the number of soldiers killed or wounded in the "war in Ireland" since January, 1920, said that 127 had been killed and 268 wounded.

In the Sudbury police court a settler was sentenced to one month in jail with hard labor for setting a fire which eventually destroyed half a million feet of pine timber. This is the first jail sentence on record to be meted out for this offence.

Since the inaugural meeting of the League of Nations Society on May 31, many applications for membership have been received. Among others, a unit of the Army and Navy Veterans has enrolled its total membership.

From sources considered reliable, it is learned that General Lermond, head of the Inter-Allied Commission, has issued verbal instructions to the British, Italian and French troops not to fire on Polish insurgents unless first attacked.

Dr. Koo, Chinese representative to the League of Nations, has notified the secretary of the league that it is the intention of the Chinese Government to give effect to the league assembly's recommendation concerning limitation of the expenditure on armaments.

Healthy, Happy Boys and Girls

Is your child healthy? Is he or she up to standard weight, of good color, with plenty of rich, red blood to nourish the growing tissues?

For children who are thin, pale, anemic, under weight, nervous, restless, sleepless, Dr. Chase's Nerve Food is of the greatest benefit imaginable.

Being mild and gentle in action, and yet wonderfully potent as a restorative, it soon makes the blood rich and builds up the feeble nerves.

30 cents a box, 6 for \$5.00, all dealers, or Dr. Chase's Nerve Food.

CANADIAN BUSINESS IS YOUR BUSINESS

Individuals should demand Canadian products, buy only necessary imported articles, and seek acceptable Canadian substitutes for imported commodities.

All Canadians should help their country, and themselves by patronizing Canadian goods and services.

Be fair to your own country. Correct the prejudice that is curtailing national prosperity. Canadian goods need no apology. Generally they represent better value than imported products. Many commodities of Canadian manufacture are unsurpassed in the world. If even 25 per cent. of the goods imported into Canada last year had been supplied from Canadian sources, direct employment would have been provided for some 65,000 additional workers at good wages. Including dependents, such additional business would have supported directly more than 250,000 persons. Every dollar spent in Canada on Canadian products means more money for Canadian workers, improved demand for farm and factory products, and additional business for wholesalers and retailers.

The question is sometimes asked, "what goods could be made in Canada which are not now made here? There is a considerable list of articles which could be manufactured in the Dominion if adequate protection were provided, and if the Canadian public as a whole would give their support to such new Canadian industries. Even more important, however, than the starting of the manufacture of new products in this country is the encouragement of those industries which are now operating here and which are striving in every possible way—for the most part on a very narrow margin of profit and in some cases at considerable loss—to serve the Canadian public goods of quality and at the lowest possible prices consistent with such quality. The need is not so much that new industries should be started, although much remains to be done in this direction, but rather that the volume of imported goods of a class and kind manufactured here should be reduced and this business diverted to Canadian producers and Canadian workmen.

It must be recognized that a very large proportion of the goods imported into Canada are necessary and unavoidable. In large measure they consist of raw materials for use in Canadian manufacturing establishments. The imports do, however, include a very considerable range of goods, representing a large aggregate value, which could be and should be obtained from Canadian sources.

There is no justification for importation into Canada of unnecessary commodities. It must be noted, of course, that there is, and will continue to be, a certain amount of trans-boundary trade in natural products, which explains our importations of wheat, for example. A considerable amount of our importations of foodstuffs consists, of early seasonal products. Due to geographic and climatic conditions crops ripen later as one moves northward. We import considerable quantities of early potatoes from Bermuda, and tomatoes, strawberries and other early fruits from the Southern States before our own crops are available. The southern products for the most part are not comparable in flavor with our own, but they appear on the market first and are largely bought as luxuries. When our own crops ripen, despite their superior quality, the "edge" has been taken off the American appetite and to some extent off the appetite of our own people. By exercising a little patience until our own crops are ready, the Canadian people can contribute materially to restricting imports of products of the kind.

Think before you buy! In supporting Canadian industry, the Canadian people will be helping towards the only real and permanent solution of our pressing national problems, and they also will be protecting their own employment and assisting to safeguard their own best interests. Buy Made in Canada goods and utilize Canadian services, not in the spirit of making a sacrifice, but because it is good business—in most cases it means much better value for Canadian dollars.

ROUTE CARDS

Notice to Horsemen

The Star is prepared, as usual, to furnish you with neatly printed Route Cards at a reasonable price. We have illustrations suitable for nearly all breeds of horses.

GET YOUR GOVERNMENT CERTIFICATES

There is always a certain amount of time lost later in the season through horse owners not having complied with the Government regulations respecting stations.

The possession of a Government Certificate for 1921 is absolutely necessary and it must be printed on your Route Cards. Send for yours now and thus avoid delays later on.

UNION BANK OF CANADA

Wainwright Branch, G. C. Siddall, Manager

THE UNDESIRABLE SCRUB BULL

That invariably defective animal, the scrub bull, is being gradually eliminated. The Live Stock Branch at Ottawa, by its policy of loaning pure-bred bulls to specially-organized associations, in newly settled districts and in backward sections of the older provinces, is doing much towards achieving this end. In the seven years following the inauguration of this policy in 1913, 2,531 bulls, purchased for \$368,596 an average of 144.85 per head, had been so loaned. Of these, British Columbia has had 119, Alberta 497, Saskatchewan 539, Manitoba 220, Ontario 216, Quebec 759, New Brunswick 64, Nova Scotia 79 and Prince Edward Island 38. Returns substantiate the statement that where these bulls have been used there has been a considerable improvement in the stock marketed, and that in many districts to which bulls were loaned five or six years ago, farmers have felt warranted in buying pure-bred animals of their own. As a result, department loaned sires are released and sent to more needy districts. This is particularly noticeable in Quebec, where the number loaned decreased from 200 in 1916 to 69 in 1919 while Alberta and Saskatchewan the loanings had increased. It is interesting to note as evidence of the economy practised in carrying out the policy that in one year 426 bulls whose usefulness had become impaired were sold for an average of 67 per cent. of their original cost.

ALBERTA'S NATURAL RESOURCES.

There is every reason to believe that the recent visit of Premier Stewart to Ottawa has resulted in a very considerable step forward in the matter of our Natural Resources. The Premier was given a very hopeful reception by Premier Meighen, and the Alberta Premier is very hopeful of the result. The Alberta members in the Federal House are also hopeful. Regardless of party affiliations they were behind Premier Stewart to a man. The question of our Natural Resources seems to have not past the stage of being a political football. Both parties realize that Alberta needs development, and that full development cannot come until we control our own natural resources. This is all to the good. The rough accounting promised to Premier Meighen is now being undertaken. When this work is completed negotiations will again be re-opened, and Premier Stewart expresses the greatest confidence in the outcome. Without waiting for the actual handing over of our resources the government of Alberta has started out on a plan of development involving enormous obligations. These obligations, it is true, are in the nature of bond

guarantees for irrigation in one part of the province and drainage in another, but they have been

entered into so carefully and surely, and after such calculation that the province is not likely to be called upon to pay a cent of these guarantees. However, no province should be called upon to proceed with its own development to this extent unless it is given the backing of the entire natural resources of that province. The power that be at Ottawa have realized this. The people of Alberta have realized it for some time past. The Alberta government has done its part. Apparently it is now a matter of accounting, and the sooner the rough accounting is initiated and better with the citizens of Alberta be pleased. In the meantime the situation looks very hopeful.

An undertaker is about the only man who doesn't have a catalog house competition.

IMPERIAL Polarine MOTOR OILS

Maintains Economy

IMPERIAL Polarine Motor Oils save many thousands of dollars every year for Canadian motorists because of reduced operating expenses.

Imperial Polarine Motor Oils cut down repair and maintenance costs, reduce fuel bills and insure you for all time against excessive depreciation and repair expenses. Imperial Polarine quality *maintains economy* all along the line.

Judged by quality—gauged by actual miles of perfect lubrication each gallon will give, and by real motoring satisfaction, Imperial Polarine is the least expensive motor lubricant that you can obtain. The more carefully you check up costs, the more thoroughly convinced you will be of the advantages of using Imperial Polarine Motor Oils *exclusively*.

Standardize on the *correct grade* of Imperial Polarine Motor Oils. Consult our Chart of Recommendations at your dealer's or write to 56 Church Street, Toronto, for our interesting booklet, "Automotive Lubrication."

IMPERIAL OIL LIMITED

Crop Prospects In West Could Not Be More Favorable

Ottawa.—The total area estimated to be sown to wheat for the harvest of 1921 is 18,654,100 acres, according to preliminary estimates just issued by the Dominion Bureau of Statistics. Last year's final estimate was 18,232,374 acres, and the average of five years from 1915-1919 was 16,342,969 acres. The estimate for fall wheat is 7,091,000 acres for the year and the area under spring wheat 17,945,000 acres. Of oats, the total area sown is placed at 15,295,000, an increase of 2 per cent. from last year. There is also a decrease of 4 per cent. in barley, the acreage being 2,456,000 acres. Rye, sown to 695,150 acres, shows an increase of 7 per cent. Hay and clover acreage is estimated at 10,545,000 acres, an increase of 2 per cent. Alfalfa shows a decrease of 3 per cent. and potatoes a decrease of 6 per cent.

Conditions have been ideal in the prairie provinces during May, so that prospects for wheat are more favorable than at this period in any year since the prolific season of 1915. The estimated area under wheat in the prairie provinces is 17,418,000 acres; barley, 1,722,000 acres; rye, 541,000 acres. In Quebec and Ontario weather during May has been dry and cold, so that the prospect was less favorable. June rains have, however, much ameliorated the situation.

Greek Liner Sinks In Aegean Sea

Steamer Struck Mine and Many Lives Are Lost. Athens.—Many lives are believed to have been lost in the sinking of the Greek steamship Boukolina which struck a mine in the Aegean Sea. The Greek battleship Lemnos has arrived at Piræus from Smyrna with two passengers who were picked up. Details of the disaster are lacking.

Paris.—The mail packet Boukolina, which has been sunk in the Aegean Sea by a mine, had 240 passengers on board, besides a crew of 25, says an Athens radio despatch. The Boukolina was built at Newcastle, Eng., in 1878. Her registered tonnage was 1,312.

Prospectors Going To Elbow Lake

Reported Gold Discovery Cause Rush To That Territory. The Pas, Man.—Remarkable statements made here by returning prospectors from the scene of the reported gold discovery at Elbow Lake, have caused a rush to that territory. Prospectors assert that a mineral body forty feet wide and traced for 350 feet in length has been uncovered throughout which free gold is heavily deposited. One prospector had two pounds of ore, of which the gold content was at least two per cent. These samples are considered the most spectacular and richest ever brought here.

Dan Austin, describing the discovery, said he stood on the shore of the lake and saw the ore body dipping into it, showing free gold standing out everywhere. Going over the exposed portion of the vein, he claims to have found gold in every section.

France Adds to Navy. Paris.—The Chamber of Deputies adopted the naval programme presented by Deputy Paul Denise, reporter for the naval commission, calling for the construction of six light cruisers, 12 destroyers, 12 torpedo boats and 36 submarines, at an approximate cost of 1,161,000,000 francs.

Kansas Harvests Wheat. Pratt, Kan.—Wheat harvesting will begin in some sections of Pratt county the latter part of this week and will be in full swing by the middle of next week.

Trials Of War Criminals Causes Great Dejection Among German Military

London.—Sir Ernest Pollock, the solicitor-general, replying in the House of Commons to a question by Horatio Bottomley, Liberal, as to whether Sir Ernest was satisfied with the results thus far of the trials of war criminals in Leipzig, said it would be improper to make a statement at this time. He added, however: "Perhaps Mr. Bottomley might be glad to know that a sentence delivered in my presence caused great dejection among the military part of Germany, and that the officers there certainly did not think it a small sentence to have one of their number sent to the ordinary prison in order

to carry out a sentence of ten months among thieves and felons." Referring to one of the accused who was charged with sinking a hospital ship and fled from Germany as soon as the list of accused men was published, the Solicitor-General said: "The efforts were being made to treat the man and his property has been sequestered."

The German officer to whom Sir Ernest referred as having been sent to the ordinary prison was Sergeant Heyne, who was sentenced to ten months' imprisonment May 26 for ill-treating British soldiers who were prisoners of war in the prison camp in Herne, Westphalia.

The Queen Will Not Go To Belfast

London.—It is announced that the Queen will not accompany King George to Belfast for the opening of the Ulster Parliament. Owing to the industrial situation, says another official announcement, the King and Queen have decided to hold no courts this year. Those who were to have been present will, instead, be invited to attend a garden party at Buckingham Palace in July.

Mutiny of Chinese Troops

Attempt to Check Opium Smuggling Caused Uprising.

Hankow, China.—Mutinous Chinese troops have looted and partially burned Ichang, a treaty port 156 miles northwest of here, for the second time in six months, according to official reports reaching Hankow. British, United States and Japanese embassies have been despatched to Ichang.

Consular reports indicate that attempts to check troops in reported opium smuggling operations caused the uprising. The mutineers have not been deterred, but are expected to exceed those of the November mutiny at Ichang when sixty were killed and two million dollars in property destroyed.

Chemist Says He Can Make Gold

Has Also Solved Problem of Making New York, N.Y.—Charles Benson Davis, of this city, in a paper which he has just submitted to Engineering Foundation, claims to have solved the problem of manufacturing gold. He declares he has already successfully demonstrated the possibility of making gold and other elements, such as silver, platinum and copper, by transmutation of a common element. He has shown samples of the metals he claims to have made to members of the Engineering Foundation and has requested that body to investigate his claims and his methods.

Admiral Sims Stands By Statement

Sees Nothing Un-American in Speech About Sinn Féin.

London.—Rear-Admiral William S. Sims, U.S.N., is quoted by the Press Association as saying with regard to the speech he delivered on the Irish question: "I stand by all I said, every word of it. I shall not repudiate a single word, and I see nothing un-American in it." Admiral Sims, who said he had not received the cablegram reported to have been sent him by Secretary of the Navy Denby, inquiring if the admiral was correctly quoted in the reports of his speech, has arranged to have the cable message delivered to him as soon as it reaches London.

Speaking at a luncheon given by the English-speaking Union at London recently, Admiral Sims dealt frankly with Sinn Féin propagandists in the United States. He was said to have declared that the persons he assailed were United States citizens "when they want money, but Sinn Féiners when on the platform," and added: "They are making war on America today."

Prices Must Come Down

New York.—Prices in the United States must either come down or those in Europe must go up to meet them if the economic situation in this country is to be settled, Mark Sheldon, Australian commissioner to the U.S. declared at a farewell dinner given him by a session of foreign press correspondents. Until this adjustment has taken place, he said, there could be no resumption of the enormous prosperity the U.S. has enjoyed.

Pioneer of Yukon Dead

Dawson, Y.T.—Jas. B. O'Neill, pioneer hotelman of Dawson, White Horse and Tatum, died last week of a long illness. He was one of the most popular men in the Yukon, 41 years old, and was a native of Nanaimo, Ont. His father, formerly station agent for the Grand Trunk railway at Nanaimo, now lives in Vancouver, where he has other relatives.

Silver Strike in B.C.

Prince Rupert, B.C.—An important silver strike is reported on the "Gabriel Group" in the Skeena Valley, up the Copper River. The property is owned by D. Buchanan, a Montana man.

Jap Minister of War

Tokyo.—Hanso Yamanashi, lieutenant-general in the Japanese army, has been appointed Minister of War to take the place of Lieutenant-General Tanaka, who resigned.

W. N. U. 172

Working For Better Dairying

Percy E. Reed, Dairy Commissioner for Saskatchewan.

Indians Sell Standing Timber

Redskins Will Become Wealthy Through Big Deal.

Superior, Wis.—Contracts with Chippewa Indians of the Net Lake, Minn., reservation have been signed by the Northwestern Paper Company of Columbia, Minn., whereby the company will pay them approximately \$500,000 for 25,000,000 to 30,000,000 feet of sawed timber and pulpwood in the vicinity of Net Lake.

The deal marks the sale of the last large tract of standing timber in the Lake Superior district owned by Indians. Some of the Indians will receive as high as \$10,000 and \$15,000 for timber on an 80-acre allotment. From paupers, many of the redskins have become wealthy.

The Indians are among the most primitive in the north woods and what they will do with their newly acquired fortunes is causing Government agents much concern.

The Coal Shortage in Britain

To Meet Situation National Kitchen Sold Hot Water to the Working People.

Hull, Eng.—The shortage of coal has been so serious here during the strike of miners that the people were unable to obtain hot water. To meet this situation, the National Kitchen, which happened to have a supply of coal, sold hot water to the working people at one-half penny a bucket. The shortage of coal also produced a shortage of ice as it handicapped the artificial ice plants. To obviate this, the workers were sent to Holland to bring coal which they exchanged here for ice.

To Foster Cotton Growing

Grant For Industry Within the Empire Is To Be Increased.

Manchester, Eng.—Winston Spencer Churchill, colonial secretary, addressing the British Cotton Growing Association, announced that it was the Government's intention to devote £1,000,000 to foster cotton growing in the British Empire instead of £500,000 yearly for five years, as formerly promised.

Mr. Churchill said that although much had been achieved in cotton growing in the Empire, it little compared with what might be done. Referring to Egyptian cotton, he declared it to be superior in quality and only second in quantity to that obtained from the United States.

To Prosecute Census Objectors

Montreal.—The Government is about to prosecute a few Montrealers who have steadily refused to give the required information to the census enumerators, a commissioner states. So far objectors have been given every chance, but as the time is now drawing to a close, the commissioners are reporting cases where information has been refused, directly to Ottawa and will be dealt with there.

Anti-Cigarette Law In Utah

Salt Lake City, Utah.—Utah's anti-cigarette law, passed by the last Legislature, is now effective. Simultaneously the shelves of tobacco stores were cleared of cigarettes, and there were no advertisements in the newspapers of cigarettes. The law provides against smoking in public places, which are defined and prohibits the giving away, sale, exchange or barter of cigarettes.

Irrigation Project Begun

Leithbridge.—Team work on the Leithbridge Northern Irrigation Dam project will be in full swing in a very few days, but as the time is now drawing to a close, the commissioners are reporting cases where information has been refused, directly to Ottawa and will be dealt with there.

Germany May Join League

Geneva.—The assembly of the union of the League of Nations Association, adopted a resolution in favor of the admission of Germany to the League of Nations.

Would Unseat De Valera

London.—Practical action has been instituted, says the Belfast correspondent of the Evening News with the view to making void the election of Eamon De Valera, the Irish Republic leader, as a member of the new Ulster Parliament, on the ground that he is an alien. A leading firm of Belfast lawyers, according to the correspondent, has been engaged to investigate De Valera's antecedents, and already steps are afoot for collection of evidence in the United States and elsewhere, especially from De Valera's speeches on the subject.

Sweden Discovers Plot For Revolution

Organization Revealed By Arrest of Bolshevik Leader.

Stockholm.—What the newspapers here considered as a sensational and widespread plot for Bolshevik revolution in Sweden, was uncovered as a result of the arrest of a widely known Bolshevik leader in Kiruna, in the iron mining district. It was said that a Communist organization was discovered there. Several arrests also have been made in Stockholm.

Help For Russia

Outcome of Recent Visit of Soviet Minister to Berlin.

Berlin.—Early collaboration between a group of German and British capitalists for the purpose of economic exploitation of Soviet Russia is believed here to be certain. It is understood that an agreement has been reached in the past few days between men of both countries, as to the direct outcome of the recent visit to Berlin of the Soviet minister of trade and commerce.

Steamers Arrive at Dawson

Brought Miners and First Passengers For Outside Points.

Dawson, Y.T.—First steamers from lower Yukon points made port when the Alaska and the Yukon arrived with large cargoes. They brought barges to haul silver ore from Mayo to the coast, and will proceed to the new silver mines district at once. They bring a number of miners to the Mayo district as well as the first passengers from the lower Yukon for outside points after the winter's work.

Proposed Imperial Air Mail Service

Scheme Would Give Britain Fast Service to Colonies.

London.—A scheme for an imperial air service is suggested to the Government by H. H. Abbott, agent-general for Tasmania, with a view to the utilization of surplus airships and planes.

His proposal is that a company be formed with a large capital, one-half of which would be taken up by the Governments of India, South Africa, Australia, New Zealand and the Malay States, and one-half by public subscription. The plan is that a great air mail service should be organized which would bring Great Britain within five days distance of India and South Africa, and within 10 days of Australia.

Immigrants Barred

German, Austrian and Turk Tourists Can Enter Canada.

Ottawa.—The Department of Immigration and Colonization says that tourists do not require passports as a condition of entry from Canada to the U.S. or for the return journey. Immigrants coming to Canada to work or reside from Germany, Austria, Hungary, Bulgaria or Turkey, are debarred. The ban does not apply to persons coming to Canada from these countries when "belonging to the non-immigrant classes."

Prevent Confiscation In Russia

Reich.—A Moscow despatch announces that a decree is being prepared to prevent further confiscation of money from private persons, except by court trial. Another decree provides that anyone arrested must be given the reason for this within 24 hours, and if a member of a trade union he be released if the union vouchers for him.

Admiral Sims' London Speech

Washington.—Secretary of the Navy Denby has instructed Rear-Admiral Sims to advise the Navy Department immediately by cable as to whether he was correctly quoted in press accounts of an address he made to the English-speaking Union at a luncheon in London, June 7.

King of Serbia Ill

London.—King Peter of Serbia, is seriously ill, according to a despatch to the Daily Mail from Belgrade. The despatch adds that Prince Alexander, the regent, has been urged by the ministerial council to return home from France where he is on a visit.

True Bear Stories

By O-G-M-A-S-E-S (Little Clerk).

(Copyrighted)

(Continued)
Well he realized that if this shot was not a fatal one his chances were slim, still he went on with dauntless courage, though as he told me his heart beat a little faster than usual. At last he noted a huge dead spruce tree fallen across the track, and stopping and studying the situation he felt convinced that Mr. Bear was either concealed behind it, or very close to it. Creeping up to within a few feet of the tree, full cocking his smooth bore gun, he broke a dry stick sharply and on the instant over the tree came the grizzly, mane bristling like an angry dog, mouth wide open with huge fangs exposed, growling savagely he charged right at Robert; he, waiting until the bear was so close the powder burst his flesh, shot him right through the brain and killed him instantly. Robert camped beside his victim that night and carefully skinned him, but so many of his kind the skin was in poor shape, scars and cuts from many fights, also traces of several old bullet wounds. He was very thin and, as Robert quaintly expressed himself, mighty hard chewing.

The inroad of the grizzly into our country caused much excitement among the Indian as their huge claws are much coveted by the young warriors as signs of their prowess in hunting. Old Kinstano, however, was the only one who had a necklace of these and it was exciting enough to hear him tell of his fights with them when on buffalo hunting and when on his stealing excursions to the Great Plains.

In my own case there was food for thought as most of the winter on trips to Indians I was sleeping out and invariably alone, hardly ever carried fire arms and would certes have been an easy prey for a wandering grizzly.

It was the fifth night out after a trip on my homeward journey, with a game trail, I have named Nellie, who was well beyond description; I had a flat sled with a bulky load of furs; the weather was intensely cold, in February, I think, and I had selected a camping place somewhat earlier than usual. In the middle of a small green poplar bluff, with a bunch of dry trees in the centre, near at hand was a dry hay-swamp well sheltered by scrub and timber and in it I tethered my pony to a green pole about the size of a fence rail, notching the centre slightly so that the tie would not slip; she could drag this about the swamp and keep herself warm by pawing the snow for the fresher grass underneath, but if she attempted to leave the swamp the pole would at once catch the trees.

About an hour's hard axe work gave me a camp; a nice little clearing with two large piles of cut wood on each side of the fire wood cut to about five foot length and you can then stretch your length and enjoy the heat front and back, for in spite of severe cold you are bound to sweat more or less while travelling. Unloading the sled, I piled the bales at the back, and with the snow shovelled (by snow-shoe), made a break from any wind on three sides while the front was filled with a glorious fire. After a good supper, I made a final trip to my pony in which the tether was carefully

done this time her head allowed her to reach my camp. At breakfast, which I always shared with her, she being very fond of both bread and sugar, I made a promise, and it was that I would never part with her, and when she got beyond work she would be pensioned off to live in the shade of a big tree, and she passed a serene old age surrounded by her offspring, some of whom can be seen driving into Melfort today, handsome enough, but I doubt if any could show the same lion like courage as the one in which little Nellie proved on many a long trip.

German Bank Prosperous

Large Financial Institution of Berlin Increases Capital.

Berlin.—Announcement of a capital increase of 90,000,000 marks is made by the Dresdner Bank, one of Greater Berlin's largest financial institutions. This makes the capital of the bank 330,000,000 marks. The bank endorsed the \$300,000,000 worth of treasury notes recently turned over to the allied reparations commission.

Retaliatory Duty On Lumber

Washington.—The ways and means committee of the House decided to include in the Permanent Tariff Bill a duty on lumber similar to that imposed by Canada upon lumber sent to the Dominion from the United States. This is 25 per cent. The proposal was bitterly opposed by several of the committee members and it was adopted only after a lengthy fight.

Devoishire Leaves In July

Ottawa.—It has been officially announced from Government House, that their Excellencies, the Duke and Duchess of Devonshire will sail from Quebec for England on July 19, the Empress of France.

British Justice

Chief Asks Privy Council For Ownership Rights To Land.

London.—A West African chief attended in state, the meeting of the Privy Council, and asserted his rights of ownership to 250 acres of land in Lagos, taken by the Colonial Government there for public purposes. His private secretary carried a staff sent by the Prince of Lagos to identify the appellant. On this staff was an inscription certifying that it had been presented to the prince's grandfather by the British Government as a token of appreciation of assistance rendered the British in suppressing the slave trade and protecting missionaries.

Bolshevist Treaty With Sinn Féin

London.—"The Government issued as a 'white paper' the text of what appears to be the draft of a proposed treaty between the Russian Soviet Government and the 'republic of Ireland,' which the Government states was captured in Dublin.

BRITISH FORCES DRIVE POLES FROM ROSENBERG WITHOUT FIRING A SHOT

Oppeln.—Five thousand Polish insurgents have been driven out of the city of Rosenberg, northeast of the city, by British forces. The Poles made a show of resistance but the British did not fire a shot. When the British soldiers entered the city, the Poles dropped a few poorly-aimed shells behind them, and there was a scattering pattern of rifle shots from the Polish positions. The Poles then picked up their machine guns which had been set up in a road and fled.

G. McMorris, District Superintendent, Williamson Block, Edmonton, Alta.

U. F. A. DECIDES ON POLITICAL ACTION IN ELEVEN RIDINGS

U. F. A. provincial associations are now in existence in the following provincial constituencies: Cochrane, Alexandria, Pembina, Coronation, Stettler, St. Albert, Lac Et Anne, Red Deer, Stony Plain, Lacombe.

Conventions have been announced: Little Bow, Carmangay June 3; Hand Hills, at Hanna, June 7; Acadia at Oyen, June 8; Ribstone at Car, June 24th.

Already the United Farmers of Alberta have organized for provincial action in eleven constituencies, and preparations have been made for four other ridings. Candidates have not been placed in the running, but arrangements have been made for speedy action, should an election be called for suddenly.

In the eleven constituencies, one Cochrane, is now represented by a U. F. A. member. Of the others, Pembina, Red Deer, Stettler, St. Albert and Red Deer are represented by supporters of the government. Alexandria, Coronation, Lac Ste. Anne and Stony Plain are now represented by Conservatives.

In addition to the provincial constituency conventions, three federal districts will hold conventions this month. The three are: Victoria, at Vegreville, on June 14 and 15; Strathcona on June 24 and 25; Battle River at Wainwright on June 22 and 23.

FOR SALE—At a real snap price: Good House and Lot; with good well barn and corral; situated on Second Avenue.—See J. W. Lee, Wainwright P. O. 27-7p.
